DETAILED ACTION

Allowable Subject Matter

Claims 1-12 and 15-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 15 have been amended to include objected to subject matter. The combination of the original limitations of the independent claims along with the amended limitations of "wherein the inter-core context switching includes swapping virtual CPU numbers between the CPU core selected for diagnostics and a recently-tested CPU core being put back to use.", make them allowable over the prior art. The specific process of selecting a core within a multi-core processor in order to test the core and then to use context switching to test the other cores in combination with using virtual CPU numbers to determine which cores are under test and which are running normal process, all while running in parallel is novel over the prior art. Therefore, claims 1, 15, and all the claims that depend on them are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
